EXPERIENCE

ArtTrader (Bootstrapped Startup)

June 2023 – Present

Founder & Lead Engineer

Remote

- Architected a high-frequency trading platform (artrader.org) for automated crypto strategies.
- Engineered frontend via **Next.js (App Router)** with SSR, cutting page load times by **30%** (perfect Core Web Vitals).
- Implemented low-latency data layer using **WebSockets**, ensuring real-time updates without UI freezes.
- Established CI/CD pipelines and automated testing, reducing average bug resolution time by **40%**.

code.store

Feb. 2025 – Present

Senior Software Engineer

Remote

- Migrated legacy low-code platform to full-code architecture (**Next.js, Node.js**) with **zero downtime**.
- Designed hybrid modules extending system capabilities, increasing platform flexibility by **40%** for enterprise clients.
- Reduced API latency by **25%** through database indexing and efficient caching strategies.
- Mentored 3 junior developers, enforcing strict TypeScript standards and conducting code reviews.

Ninetwothree

June 2024 – Jan. 2025

Senior Software Engineer

Remote

- Delivered full-stack product from concept to production in **5 months** (95% match with requirements).
- Implemented unit testing covering **85%** of codebase, reducing post-release defects by **40%**.
- Built unified admin panel and mobile backend using **PostgreSQL** and **Knex.js**.

Point Education

Mar. 2024 – June 2024

Lead Developer

Remote

- Designed monorepo architecture (**NestJS, tRPC**), reducing API response times by **20%**.
- Led a team of 3 devs, introducing agile processes that accelerated feature delivery by **15%**.

8allocate

Nov. 2023 – Mar. 2024

Software Engineer

Kyiv, Ukraine

- Developed serverless architecture using **AWS Lambda** and **Step Functions** for a mission-critical app.
- Optimized cloud costs and reliability by implementing **AWS CloudWatch** for proactive monitoring.

PREVIOUS EXPERIENCE

LeanSquad | Software Engineer

June 2023 – Nov. 2023

Erbis | Software Engineer

June 2021 – June 2023

SKILLS

Languages: JavaScript (ES6+), TypeScript, Java, Python, SQL

Stack: React, Next.js (App Router), Node.js, NestJS, Spring Boot, PostgreSQL, MongoDB

Cloud & DevOps: AWS (Lambda, Step Functions, EC2), Docker, CI/CD, Microservices

Concepts: System Design, Serverless, Event-Driven Architecture, LLM Integration, Agile

EDUCATION

Taras Shevchenko National University of Kyiv

Kyiv, Ukraine

Bachelor's Degree in Psychology

2019 – 2023
